Tajweed Tip-1

- ✓ If the makhraj of letters are new to you in a verse, then first listen to that verse 10's of times. Why? To make your brain 'receive' that sound clearly. That's how an Arab child learns. He first listens to the words 100s of times.
- ✓ Therefore, listen to اَعُوْذُ بِاللّٰهِ --- tens of times before you say it.

Tajweed Tip-2

- ✓ You can improve your Tajweed to a great extent just by listening to an expert Qari and repeating it in exactly the same way with the Qari and then after the Qari.
- ✓ It will fix a number of flaws in your recitation.

Tajweed Tip-3

- ✓ When you find difficulty in reciting a verse, break it into words and take one word at a time.
- ✓ If the word is also difficult, then take one syllable at a time.
- ✓ Syllable: a unit having one vowel sound. For example, Alhamdu has 3 syllables.
- ✓ Practice that syllable where you have difficulty.
